

DOGA SCREWDRIVERS TRANSDUCERIZED

Doga's transducer controlled screwdrivers provide high-precision accuracy and reliability for industrial tightening needs. These screwdrivers allow for seamless control of both torque and tightening angle, ensuring a secure connection at every stage of production.

- | Built-in torque sensor
- | Digital torque and angle adjustment
- | Up to 15 tightening programs and 2 multi-step sequence programs
- | User-friendly touchscreen on the controller
- | ParaMon software for real-time tightening monitoring
- | Versatile communication interfaces (RS232C, Ethernet)
- | Error diagnosis via code display
- | Fast and precise torque analysis
- | Long lifespan: over 5 million cycles
- | ESD protection and easy installation
