

HYTORC LION BATTERY TORQUE WRENCHES

Battery-powered torque wrench equipped with internal memory for data storage and a digital display.

The LION, representing the cutting edge of HYTORC's product development, is a lightweight and powerful battery-powered torque wrench designed for professional use. The LION offers a quiet, vibration-free, and highly efficient torque output at a consumer-friendly price, without the limitations of hoses or cables.

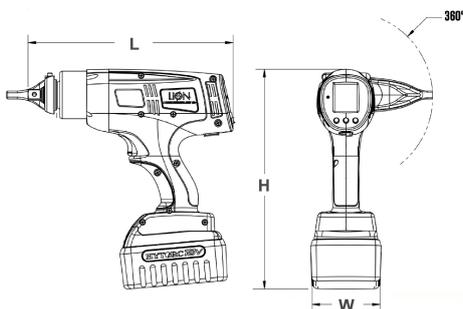

The built-in computer stores the results of all tightening operations, which can be easily transferred to a computer in an Excel-readable format via USB cable or Bluetooth (BSM). The set torque value is easy to adjust and verify using the digital numeric display on the rear panel. Available with continuous power supply option.

FEATURES:

- Durable and long-lasting 18V/4.1 Ah Li-ion battery
- Lightweight and robust design provides an excellent power-to-weight ratio
- Clear and easy-to-read digital display
- Modern brushless motor ensures quiet, energy-efficient, and vibration-free operation
- Ability to document torque values and transfer them to a computer in an Excel-readable format
- Delivered as a complete set including the wrench, carrying case, 2 batteries, charger, and reaction arm
- Programmable with the HYTORC Connect App

Item	Torque range Nm	Drive	H mm	L mm	W mm	Free speed rpm	Weight kg**
