

TORQUE SCREWDRIVERS DIAL MEASURING

The Gedore Torque range of Dial Measuring Torque Screwdrivers are designed for torque evaluation and torque verification, in order to ensure process conformity, product safety and absolute reliability. These low cost and versatile tools provide accuracy, reliability and economy in a wide range of maintenance and repair, quality control, research, development and assembly operations in any engineering or manufacturing environment. These versatile tools with the torque range of 0.1 – 5 Nm are perfect for any manufacturing environment.

- The dial provides efficient measurements in both directions, delivering flexibility and minimizing tool investment
- 1/4" quick coupling, a 1/4" square adapter also available
- Unique memory function
- Better than +/- 6% accuracy (ISO6789:2017) for all models
- All models are ESD compliant
