

# APEX U-GUARD

Apex's high-quality and wear-resistant products are available with U-GUARD protective covers.

Advantages and Benefits of Apex U-GUARD:

- Improved work safety
  - Rotating socket or similar does not scratch work surfaces
  - Easier handling increases work efficiency
  - Freely rotating protective cover can be attached, for example, to an extension bar
  - Elastomer material reduces vibrations and impacts
  - Insulated adapter provides protection up to 1000 V

Apex U-GUARD protection is available for many standard products such as bits, bit holders, power sockets, extension bars, machine sockets, and various connection points, such as between the socket and extension bar or between the socket and angle adapter (see image above).
